

Game Harvesting Auditing Project

Summary of Feedback, Responses and Actions

April 2020

This project includes the development of one unit of competency and one skill set within the *AMP Australian Meat Processing Training Package*. The final draft materials were developed as a result of feedback provided by stakeholders and Subject Matter Experts (SMEs) during the validation period 4 December 2019 to 9 March 2020.

A validation meeting was held on the 12 December 2019 where all documents were validated through this process. The outcomes of this meeting have been summarised in this report.

Validation feedback was also received from one other stakeholder around the country via email. The table below provides an overview of the groups and jurisdictions that have provided feedback during this phase of the project.

	ACT	NSW	NT	Qld	SA	Tas	Vic	WA	National
Industry (employer / employee)									
Industry association (includes feedback from Industry Advisory Bodies)									*
Union									
Registered Training Organisation (RTO) (includes feedback from CMMs)									
Government department									

** Note: Email reminders about the validation phase were sent to all SMEs and stakeholders who had registered their interest in the project, but this project was impacted due to the bushfires, floods and COVID-19. Some stakeholders who did respond to the reminder emails stated that where their industry has a representation on the Technical Advisory Committee they are happy to leave the validation sign-off in their hands, having already provided their feedback during the first draft public consultation stage.*

Below is a summary of the issues raised for the unit of competency and skill sets developed and reviewed for the Game Harvesting Auditing project, and how these issues have been dealt with. This involves a consideration of the information provided, views of industry stakeholders and from people who are part of the Subject Matter Expert Working Group process. Resolutions are constructed to consider the needs and views of stakeholders to the extent possible, and to comply with the Standards for Training Package 2012. The resolutions may represent a compromise on one or more stakeholder views with the aim of a workable outcome for industry, State and Territory Training Authorities (STAs) and training providers.

Acronyms - PC – performance criteria, PE – performance evidence, KE – knowledge evidence, AC – assessment conditions, SMEs – Subject Matter Experts
