Release	Comments
Release 1	This version released with FBP Food, Beverage and Pharmaceutical
	Training Package Version 5.0.

FBPDPR3XX2	Operate and monitor a cheese pressing and moulding process	
Application	This unit of competency describes the knowledge and skills required to see up, operate, adjust and shut down a pressing and moulding process to produce cheese to specifications.	
	This unit applies to individuals who apply basic operating principles to the operation and monitoring of pressing and moulding equipment and processes in a cheese production environment.	
	All work must be carried out to comply with workplace procedures, in accordance with State/Territory food safety, and work health and safety codes, regulations and legislation that apply to the workplace.	
	No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.	
Prerequisite Unit	Nil	
Unit Sector	Dairy processing (DPR)	

Elements	Performance Criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Prepare the pressing and moulding equipment and	1.1 Confirm materials and personal protective equipment are available for operating requirements	
process for operation	1.2 Identify and confirm cleaning and maintenance requirements according to food safety requirements	
	1.3 Identify food safety requirements for the task and product	
	1.4 Fit personal protective equipment and adjust machine components and attachments needed for operating requirements	
	1.5 Enter parameters required to meet safety and operating requirement	
	1.6 Conduct pre-start checks according to workplace procedures	
2. Operate and monitor equipment	2.1 Start up the pressing and moulding process according to workplace procedures	
	2.2 Monitor equipment to identify variation in operating conditions	
	2.3 Adjust equipment operations to meet product specification	
	2.4 Take samples and confirm that specifications are met at each stage	
	2.5 Identify, rectify and/or report out-of-specification product or process	
	outcomes	
	2.6 Maintain the work area according to workplace guidelines, work health and safety and food safety requirements	
	2.7 Enter information in workplace records in required format	
3. Shut down the pressing	3.1 Identify the appropriate shutdown procedure	
and moulding process	3.2 Shut down the process safely according to workplace procedures	
	3.3 Identify and report maintenance requirements according to workplace	
	procedures	

Foundation Skill	S	
	s those language, literacy, numeracy and employment skills that are essential for nit of competency but are not explicit in the performance criteria.	
Skill	Description	
Reading	Interpret standard operating procedures for the cheese pressing and moulding process	
Writing	 Record processing data using electronic, digital and/or paper-based formats 	
Numeracy	Confirm process remains within specification for capacity and flow of product

TITLE	Assessment requirements for FBPDPR3XX2 Operate and monitor a cheese pressing and moulding process
Performance Evide	ence
An individual demonstra	ting competency must satisfy all the elements and performance criteria in this unit
pressing and moulding pressing and moulding pressing food safetyfollowing safe work	that the individual has set up, operated and monitored, and shut down a cheese process to produce at least one batch of cheese to meet specifications, including: procedures to work practices practices ion in response to typical faults and inconsistencies.
Knowledge Eviden	се
 purpose and basic p basic operating prin main equipment equipment statu operating capace the purpose and the flow of the press processes quality characteristic effect of raw materia 	ace criteria of this unit. This includes knowledge of: principles of the pressing and moulding process ciples of equipment, including: components s and purpose of guards ities and applications I location of sensors and related feedback instrumentation ing and moulding process, and the effect of product output on downstream es to be achieved by the pressing and moulding process al characteristics on pressing and moulding process performance contamination and food safety risks associated with the process and related
 control measures operating requirements specified operating typical equipment fation of the signs and symptotic symptot symptotic symptot symp	nts and parameters, and corrective action required where operation is outside
 techniques used to testing as required to good manufacturing inspection or test por requirements 	monitor the pressing and moulding process, including inspecting, measuring and by the process practices (GMP) relevant to work task ints (control points) in the process and the related procedures and recording
 health and safety has requirements of difference 	izards and controls

- requirements of different shutdowns as appropriate to the process and workplace production requirements, including:
 - emergency and routine shutdowns
 - procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste collection and handling procedures
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- routine maintenance procedures for cheese pressing and moulding equipment
- cleaning and sanitation procedures for cheese pressing and moulding equipment
- procedures to record traceability of product.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a workplace or an environment that accurately represents workplace conditions

Assessment Conditions resources, equipment and materials:

- personal protective clothing and equipment
 - pressing and moulding equipment
 - cleaning materials and equipment
- specifications:
 - work procedures, including advice on safe work practices, food safety and quality and requirements
 - information on equipment capacity and operating parameters
 - product specifications, control points and processing parameters
 - sampling schedules and test procedures and equipment
 - documentation and recording requirements.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
