

Food & Beverage Processing project – public consultation draft updates

Based on stakeholder feedback received during the early development, and in conjunction with Subject Matter Experts, the following updates have been made to qualifications, units of competency and skill sets as part of the Food & Beverage Processing project:

- 5 qualifications consolidated to 2 (1 proposed for deletion, and 2 merged in to other qualifications, with specialisations added to *Certificate III in Food Processing*)
- 12 new units of competency created, including for non-alcoholic beverage production, dairy processing, allergens, traceability and general operational sectors
- 2 new skill sets created covering allergens and traceability
- New sector created – OIL Oil refining
- Qualifications reviewed to check alignment of qualifications to the Australian Qualifications Framework (AQF), and qualifications adjusted accordingly
- AQF alignment of units of competency reviewed – this means that some units have had their codes changed to reflect their correct nominal AQF level (e.g. *FBPGRA2013 Blend and dispatch malt* has changed to *FBPGRA3XX*)
- Some units have been moved to a different sector. This has been done to better indicate the coverage of the unit. This change will be noticed in the code of the unit. For example, the code for the unit *Control contaminants and allergens in the workplace* has been updated from *FBPOPR3001* (OPR indicating the Operational sector) to *FBPFSY3XX1* (FSY indicating the more suitable Food Safety sector)
- All units have had:
 - Foundation Skills clarified (and Core Skills for Work statements removed)
 - Performance Evidence clarified (particularly around volume and frequency of tasks to be performed)
 - Knowledge Evidence has been refined (with minor changes in most units)
 - Assessment Conditions made more succinct (with minor changes in most units)
- 20 units of competency with low/no enrolments are proposed for deletion.

The tables below provide additional information about specific changes that have been made in each component. Some components also have specific questions we would like stakeholder feedback on. This feedback can be provided in the Skills Impact Feedback Hub, or emailed to Danni McDonald – dmcdonald@skillsimpact.com.au.

Additional information is also available in the Food & Beverage Processing project – pre-recorded consultation webinar video, available from the Skills Impact website - <https://www.skillsimpact.com.au/food-beverage-and-pharmaceutical/training-package-projects/food-beverage-processing-project/>.

Qualification changes

Specific questions for each qualification are listed in the table below.

General questions for each qualification include:

- Are the core units in the qualification suitable for all sectors of food processing?
- Do the units of competency listed in the qualification accurately reflect the skills and knowledge required to perform specific tasks within a large food processing facility?
- Are all units at the correct AQF level?
- Are there any job tasks missing from the qualification?

New code	New title	OLD Unit code from TGA	OLD Unit Title from TGA	Proposed changes	Notes/Key questions
-	-	FBP10117	Certificate I in Food Processing	Proposed for deletion.	Suggest required skills could be covered by the <i>Certificate I in Access to Vocational Pathways</i> with Food Processing-specific electives chosen. (This information to be included in the <i>Companion Volume: Implementation Guide</i> .)
FBP2X120	Certificate II in Food Processing	FBP20117	Certificate II in Food Processing	Qualifications merged Packaging rules updated Changes to core units	Do you support merging the <i>Certificate II in Food Processing (Sales)</i> into this updated <i>Certificate II in Food Processing</i> ? Are the job outcomes of the proposed new qualification considered the same as those in the previous version of the qualification (FBP20117 Certificate II in Food Processing)? (i.e. Are the qualifications equivalent?)
		FBP20317	Certificate II in Food Processing (Sales)		
FBP3X120	Certificate III in Food Processing	FBP30117	Certificate III in Food Processing	Qualifications merged Packaging rules updated Changes to core units Optional specialisations added	Do you support merging the <i>Certificate III in Food Processing (Sales)</i> into this updated <i>Certificate III in Food Processing</i> ? Are the job outcomes of the proposed new qualification considered the same as those in the previous version of the qualification (FBP20117 Certificate II in Food Processing)? (i.e. Are the qualifications equivalent?) Are the units included in each specialisation appropriate? Are there other specialisations that could be added?
		FBP30617	Certificate III in Food Processing (Sales)		

Skill Sets

Two new skill sets up have been created:

- FBPSSXXX01 Manage allergens in food processing
- FBPSSXXX02 Check traceability of food products

Key Questions:

- Are the units of competency listed in the skill sets suitable for the sector requirement?
- Are there any gaps in current training and assessment of food processing that could to be covered by skill set/s?
- Are there other specialist requirements in food processing that could be covered by skill sets?

Units of competency

Specific questions for each unit of competency are in the table below.

General questions for each unit include:

- Are there potential problems that may arise through the processes described in the units of competency that could be used in the *Performance Evidence* section?
To help strengthen the problem-solving aspects in units of competency, we would like to be able to include specific potential problems that can arise in the processes covered by the unit. For example, in confectionery, a common problem to be solved involves blocked nozzles.
- Do the units of competency accurately reflect the skills and knowledge required to perform specific tasks within a “large” food processing facility?
- Is the correct language/terminology being used?
- Are the steps described in the units accurate, and are they in a logical order?
- Is the assessment reasonable?
- Are all units at the correct AQF level?

Note: coloured text below has been used to highlight key changes (such as sector area or AQF identifier in code).

Units with no changes

These units are included in the scope of this project as they are listed in the packaging rules of the Food Processing qualifications. They have been reviewed in previous updates and as such have not received any changes as part of this *Food & Beverage Processing* project. However, if changes are required, please forward feedback to dmcDonald@skillsimpact.com.au .
