

Modification history

Release	Comments
Release 2	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version X.0.
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 1.0.

AHC302	Establish pastures and crops for livestock production
Application	<p>This unit of competency describes the skills and knowledge required to prepare and establish pasture and crops for livestock and implement grazing strategies for livestock production.</p> <p>The unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.</p> <p>No licensing, legislative or certification requirements apply to this unit at the time of publication.</p>
Prerequisite Unit	Nil
Unit Sector	Broad Acre Cropping (BAC)

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for pasture and crop establishment	1.1 Confirm the pasture and crop establishment program with supervisor 1.2 Conduct pre-treatment of seed prior to sowing according to program 1.3 Select sowing methods for crop and pasture species 1.4 Apply fertilisers according to production program 1.5 Select, check and operate machinery and equipment 1.6 Identify work health and safety hazards, assess risk and implement controls
2. Implement pasture and crop establishment program	2.1 Prepare machinery and equipment according to program 2.2 Calibrate machinery and equipment to delivery specified rates of application of seed and treatments 2.3 Sow the pasture crop according to specifications and program requirements 2.4 Conduct pasture and crop sowing procedures using equipment and time efficiently 2.5 Apply fertilisers and treatments according to program
3. Implement grazing strategies during establishment	3.1 Implement stubble and fallow weed control using livestock according to grazing and crop establishment program 3.2 Implement controlled grazing of crops and pastures during pasture and crop establishment according to grazing strategy 3.3 Implement grazing management according to sustainable land management practices

Foundation Skills	
<i>This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.</i>	
Skill	Description
Reading	<ul style="list-style-type: none"> Interpret plans and strategies for crop establishment and grazing procedures
Numeracy	<ul style="list-style-type: none"> Calculate rates of application of seed, treatments and fertilisers, and calibrate equipment and machinery to deliver specified rates

TITLE	Assessment requirements for AHCBAC302 Establish pastures and crops for livestock production
--------------	--

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.
 There must be evidence that the individual has established at least 1 pasture and 1 crop for grazing or fodder for livestock and has:

- interpreted and implemented crop and pasture production plan
- selected plant species, sowing method and application to achieve optimal yield
- selected and operated machinery and equipment for establishing crops and pasture, including:
 - demonstrated safe operation and working around machinery
 - used digital technologies of equipment and machinery to improve efficiencies
- calibrated each of the following types of equipment according to specifications set in the crop establishment program:
 - boom spray
 - drill
 - fertiliser spreader
- identified pests, diseases and weeds
- implemented pest and weed control strategies without damage to crop or pasture
- mixed and treated seed safely according to crop and pasture production plan
- assessed existing pastures and crops to maximise livestock production
- sowed and monitored new pastures and crops
- identified seed and seedling stages of pasture and crop species
- managed grazing systems including weed and stubble control
- followed work health and safety and environmental policies and procedures.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- pastures and crops used for pasture their establishment and management, including:
 - advantages and disadvantages of pasture and crop establishment programs
 - types of grasses, legumes and crops
 - types of seed inoculants and fertilizers
 - paddock preparation
 - maintenance and establishment activities
 - livestock grazing strategies and determining feed on offer (FOO)
 - timing of pasture and crop establishment
 - seed and fertilizer placement for optimal germination and growth
- pests, diseases and weed control strategies in pastures and fodder crops, including:
 - identifying common pests, diseases and weeds
 - chemical control
 - cultural practices
 - grazing management
 - integrated pest management
- equipment and machinery used in crop and pasture establishment, including:
 - types and selection of equipment
 - safe operation while using or working around farm equipment
 - role of technology for improving efficiencies
- workplace health and safety policies and procedures, including:
 - safe use of chemicals
 - use and maintenance of personal protective equipment
 - farm fire safety with dried crops and stubble and accumulation in equipment
- procedures for minimising environmental impact.

Assessment Conditions

Assessment of the skills in this unit of competency must take place under the following conditions:

- physical conditions:
 - skills must be demonstrated on a broadacre farm or an environment that accurately represents workplace conditions
- resources, equipment and materials:
 - livestock for grazing
 - use of tools, equipment and machinery for preparing and sowing pasture seed and crops
 - use of personal protective equipment
- specifications:
 - use of workplace policies, procedures, processes
 - access to safety data sheets for treatments
 - use of workplace plans and specifications
- relationships:
 - supervisor
- timeframes:
 - according to specified timeframes and efficiencies.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
