Release	Comments
Release 1	This version released with FWP Forest and Wood Products Training Package Version 8.0.

FWPCOT3XXX	Coordinate and monitor wood chip stockpile
Application	<p>This unit of competency describes the skills and knowledge required to coordinate and monitor the movement and distribution of wood chips to, from and over the stockpile, including movement and loading.</p> <p>The unit applies to individuals who plan and coordinate wood chip stockpile operations, including wood chip loading and movement, in forest and wood products work environments.</p> <p>All work must be carried out to comply with workplace procedures, according to state/territory health and safety regulations, legislation and standards that apply to the workplace.</p> <p>No licensing, legislative or certification requirements apply to this unit at the time of publication.</p>
Prerequisite Unit	Nil
Unit Sector	Common Technical (COT)

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan wood chip stockpile movement operations	1.1 Determine job requirements from work order and where required seek clarification from appropriate personnel 1.2 Confirm workplace health and safety and environment requirements for the task, including use of personal protective equipment 1.3 Identify, assess and take actions to mitigate hazards and associated risks with wood chip stockpile operations 1.4 Produce stockpile schedules according to workplace procedures 1.5 Check wood chip supplies 1.6 Establish plan for stockpile operations and communicate to team members and other appropriate personnel
2. Control wood chip stockpile	2.1 Establish area for stockpile and estimate growth or contraction on basis of production and shipping schedules 2.2 Review reach of chip slinging equipment 2.3 Inspect stockpile and identify hazards within vehicle operational area 2.4 Monitor stock pile for signs of self-heating and fire and take corrective action according to workplace procedures
3. Coordinate wood chip stockpile movement and loading	3.1 Select and allocate vehicles and attachments to spread chips and load transport 3.2 Advise team members and other personnel of spreading, moving and loading operations 3.3 Coordinate stockpile levelling in accordance with workplace procedures 3.4 Maintain stockpile so that it is stable, compact and provides access for chip retrieval and for continued slinging 3.5 Coordinate and direct wood chip retrieval from the stockpile edges to transport 3.6 Maintain schedules so that sufficient quantities of chips are available to meet demand 3.7 Investigate, record and report on wood chip movement and equipment faults in accordance with workplace procedures

Foundation Skills	
<i>This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.</i>	
Skill	Description
Reading	<ul style="list-style-type: none"> Interpret routine workplace documents related to coordinating wood chip stockpile
Writing	<ul style="list-style-type: none"> Complete routine records for processing and equipment faults
Oral communication	<ul style="list-style-type: none"> Use clear, concise verbal instructions to communicate with team members to coordinate transport and direct movement of stockpile
Numeracy	<ul style="list-style-type: none"> Estimate area and volume of wood chips Estimate reach of wood slinging equipment

TITLE	Assessment requirements for FWPCOT3XXX Coordinate and monitor wood chip stockpile
Performance Evidence	
<p>An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.</p> <p>There must be evidence that the individual has:</p> <ul style="list-style-type: none"> planned wood chip stockpile operations for one production period at one site established and controlled the wood chip stockpile during one production period at the site coordinated and monitored the loading, movement and distribution of wood chips to, from and over the wood chip stockpile during one production period at the site. <p>In performing these tasks, the individual has:</p> <ul style="list-style-type: none"> followed workplace procedures safely used, and directed others to safely use, chip slinging equipment maintained wood chip stockpile to ensure stability, compactness and access for chip retrieval and ongoing slinging safely directed others when chips are delivered and transported by wheeled or tracked dozers or loaders maintained schedules to ensure that sufficient quantities of chips are available to meet demand maintained accurate records about stockpile and movement of woodchips. 	
Knowledge Evidence	
<p>An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:</p> <ul style="list-style-type: none"> purpose and safe use of equipment used in coordinating and monitoring the wood chip stockpile including: <ul style="list-style-type: none"> wheeled dozers and loaders chip slinging equipment wood chip movement and loading procedures environmental protection requirements for maintenance and safe disposal of waste material from stockpiles, and the cleaning of plant, tools and equipment environmental hazards and associated risks with stockpiles, including contamination workplace procedures relating to the wood chip stockpile causes and consequences of stockpile self-heating and fire wood chip movement and loading procedures procedures for recording and reporting workplace information maintenance procedures for tools and equipment. 	
Assessment Conditions	
<p>Assessment of the skills in this unit of competency must take place under the following conditions:</p> <ul style="list-style-type: none"> physical conditions: <ul style="list-style-type: none"> skills must be demonstrated in the workplace or an environment that accurately represents workplace conditions resources, equipment and materials: <ul style="list-style-type: none"> wood chip stockpile equipment used in wood chip stockpile operations including chip slinging equipment, wheeled or tracked dozers or loaders personal protective equipment suitable for coordinating and monitoring the wood chip stockpile specifications: <ul style="list-style-type: none"> workplace procedures for planning, coordinating and monitoring a wood chip stockpile workplace health and safety and environment protection procedures applicable to planning, coordinating and monitoring a wood chip stockpile. relationships <ul style="list-style-type: none"> team members and relevant personnel for the purposes of communicating information. 	

Assessment Conditions	
Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
